

REMOTE SERVICES

It has never been more essential to leverage digitally-enabled services. Nalco Water's digital offerings enable you to improve operational performance and minimize risk to create and capture value.

DESCRIPTION

VALUE

3D TRASAR™

At the center of the Nalco Water Solution is 3D TRASAR™ Technology.

Designed to support your unique water needs, it uses an interconnected ecosystem of smart technology, innovative chemistry, and extensive expertise to proactively solve problems and deliver effective results.

- Minimizes cost, risk and water use for peace of mind that your business is growing in a more efficient, reliable and profitable manner
- Feeds into the ECOLAB3D™ digital platform, which translates data into actionable insights to further optimize your operation
- Provides unparalleled support through our local engineers, global network of experts, and around-the-clock monitoring by our System Assurance Center

E-data

The capability that equips Nalco Water sales reps and customers to manually record data on critical KPIs. Once digitized, the data can be trended against limits and can generate alarms. Users may enter and update data from mobile devices.

- Shows trends and patterns enabling visibility into system performance through charts and graphs
- Provides a complete overview of assets
- Mitigates risk by sending alarms when a user records out of specification readings

ECOLAB3D™

A secure, cloud-based, digital platform that translates operating data from multiple sources into actionable insights using advanced algorithms and predictive analytics.

- Provides digital services to drive performance, prioritize and measure value, and mitigate risk
- Includes several unique digital services:
 - Water Quality
 - Omni
 - Financial Impact
 - Water Flow Intelligence
 - Water Safety Intelligence

DESCRIPTION

VALUE

System Assurance Center (SAC)

A remote monitoring team that provides 24/7/365 system monitoring and control, remote assistance and real-time performance visibility.

- Averts over 105,000 critical system upsets per year
- Identifies and manages alarms
- Conducts system health checks and program optimization with Nalco Water's proprietary modeling software
- Drives best practices for controller configuration
- Performs comprehensive diagnosed summary reports

Scheduled Service Reports (SSR)

A pre-designed service report that is sent on an ongoing basis. Each report is updated with the latest plant data.

- Presents updated data from plant KPIs in a consistent format on an ongoing, scheduled basis
- Displays E-data alongside critical parameters and performance graphs so engineers can make proactive decisions

eCommerce

An online service for ordering equipment and reagents.

- Search thousands of water treatment solution products
- Find personalized product lists and purchase history
- Buy quickly and easily

Ready Labels

A preprinted, bar-coded label to apply to a sample bottle or coupon card. Ready Labels replace standard labels and are available for:

- Water
- Legionella
- Microbio
- Deposits
- Coupons

- Easy-to-use and requires fewer forms to complete
- Ensures lab information is ingested in ECOLAB3D™
- Saves time
- Improves accuracy and avoids spelling mistakes

Rapid Bio Intelligence

Rapid Bio Intelligence leverages digital technology to quickly yield aerobic bacteria test results to a mobile device.

- Returns results in just 15 minutes
- Improves test accuracy with mobile image capture
- Stores easily for up to two years
